

Math—A State of Mine

IV Web Site Design Master

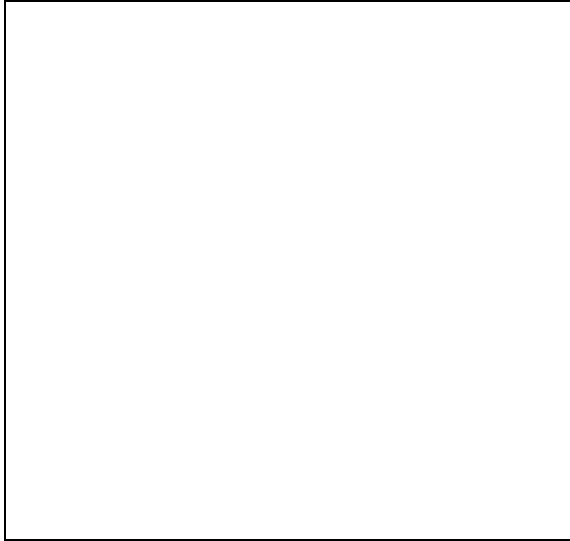

Write all of your names above and underline the name of the person responsible for holding this plan. Draw a small sketch of your web relationships and give each page a *title* that explains what is in the page. A good title is short, but informative. Your sketch should look something like this example from out Pink Panther web site:

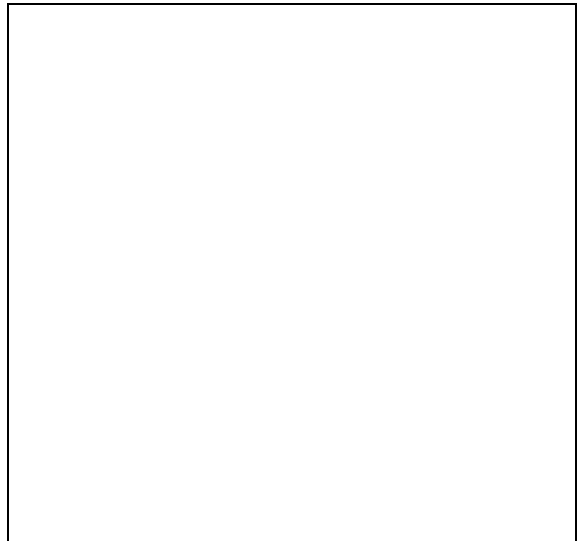

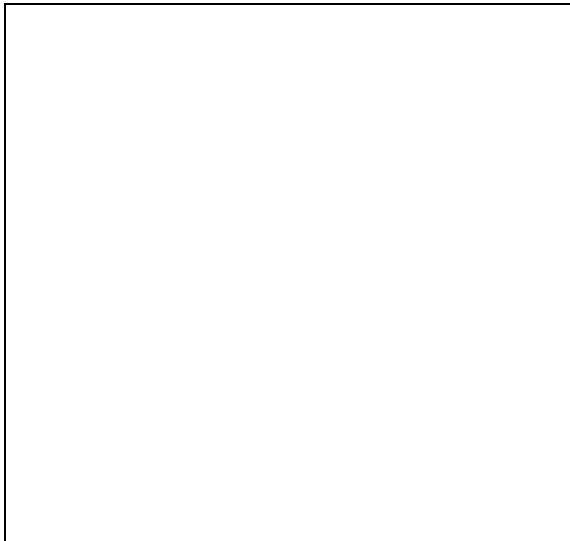

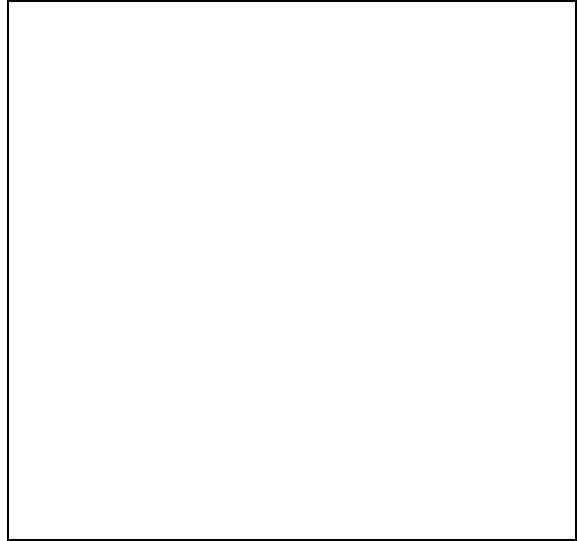

Now, it's time figure out what will go on each page and who will be responsible for each page. The following pages have room for you to write a few words telling what will go on each page. Write the title and show the major elements on each page in the boxes. Make sure that you:

1. Cover everything we discussed in class about what needs to go in your web.
2. Put in *all* the information that you had to gather in response to your nine questions.
3. Write a title for each page in the space below the box.
4. Write the filename you will use in the space below the box.

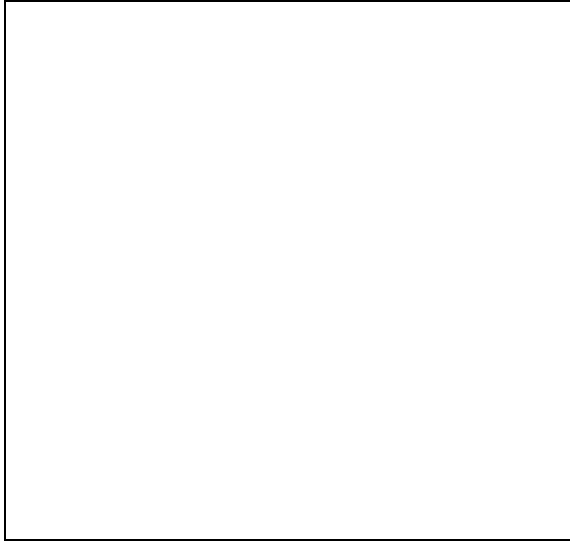

Name: _____ Date: _____ Alphanumeric: _____

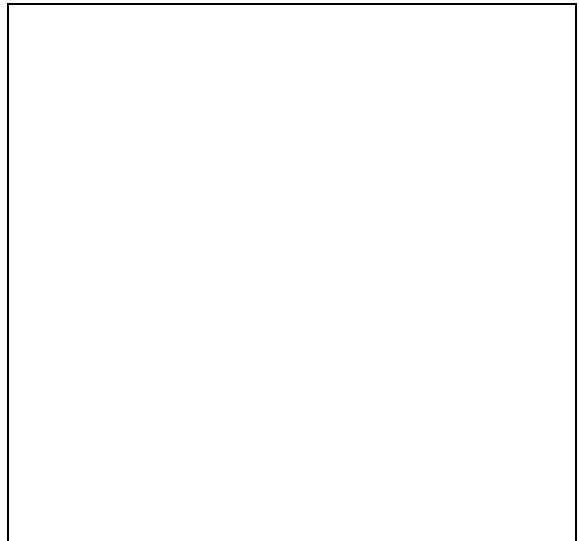

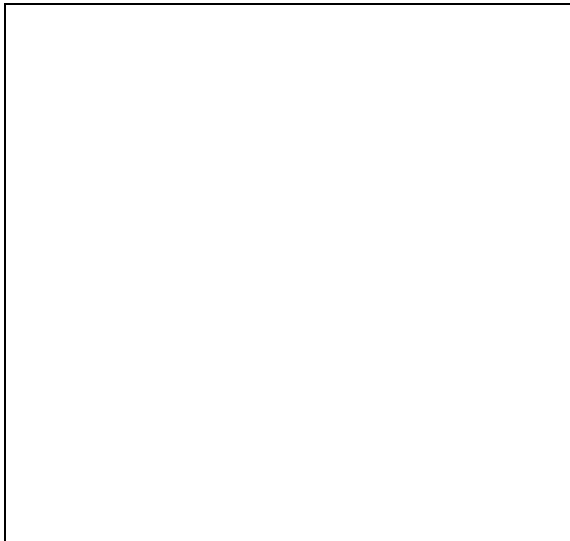

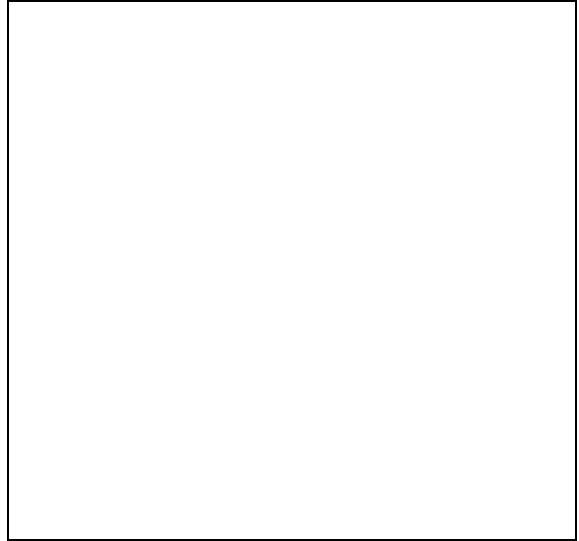

Put the title and file name in the space below each box.

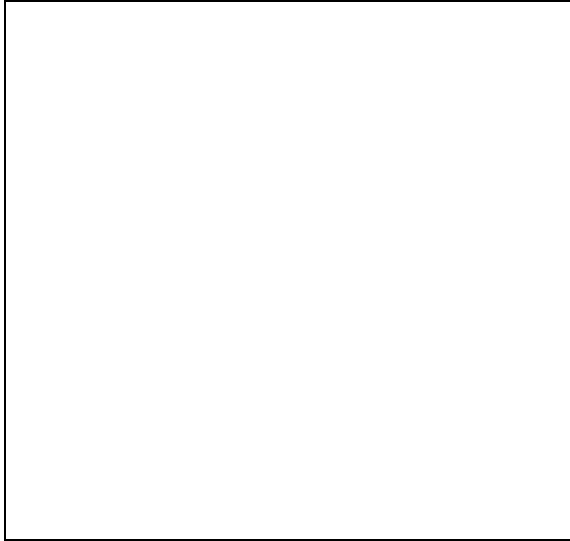

Name: _____ Date: _____ Alphanumeric: _____

Put the title and file name in the space below each box.

Name: _____ Date: _____ Alphanumeric: _____

Put the title and file name in the space below each box.
